Election/Restrictions

1. Restriction to one of the following inventions is required under 35 U.S.C. 121:
 - A. Claims 1-26, drawn to apparatus, method and computer readable medium for toner cartridge management, classified in class 399, subclass 25.
 - B. Claims 27-36, drawn to a server and method for providing a consumable goods discount service, classified in class 705, subclass 14.
2. Inventions A and B are related as subcombinations disclosed as usable together in a single combination. The subcombinations are distinct from each other if they are shown to be separately usable. In the instant case, invention B has utility separate from that of invention A, such as vending a fuel. See MPEP § 806.05(d).
3. Because these inventions are distinct for the reasons given above and have acquired a separate status in the art as shown by their different classification, search, or patentability requirements, restriction for examination purposes as indicated is proper.
4. A telephone call was attempted to request an oral election to the above restriction requirement, but the application does not identify a contact person. In addition, applicant is a foreign entity, which seldom elect orally. Applicant is advised that the reply to this requirement to be complete must include an election of the invention to be examined even though the requirement be traversed (37 CFR 1.143).

Information Disclosure Statement

5. Applicant filed an IDS with PTO form 1449 on 26 May 2004, but the examiner does not have access to the electronic files containing the cited prior art. The 1449 form will be certified and returned to applicant with the next Office action.
